

It has been a year since the Erasmus projet has begun and has got stronger. It gathers students from Spain, Poland, Bulgaria, Turkey, Italia and France.

**Lycée Evariste Galois
78500 Sartrouville**

First day in the meeting room with all the participants and supervisors of the projet

GET INVOLVED !

During the past year, different projects were developed on the initiative of students and teachers, giving to everyone a huge list of activities so everyone could find one's place. Collects for charities who give to students in need because of Covid crisis, French lessons, committed song about harassment, running for water, ecological challenges, etc. So as you could see, Erasmus is a project whose goal is to allow everybody to fulfill a task around a shared commitment and also a personal one.

Last evening party

Because of the sanitary crisis, last year's mobilities were canceled but instead of demotivating all the participants, it has reinforced our involvement. New projects were born during all the year. And finally after months of remote motivation and exchanges, the mobility to France and Evariste Galois could be organized and delegations from every partner country, made up of five students and two teachers were welcomed by the French students for one week.
